Soil Foodweb Canada Presents:

➤ The 2 Day Soil Biology Course ◀

September 24 & 25, 2007

REGISTER TODAY!!!

Soil Foodweb Canada in Vulcan, AB, is pleased to announce a **NEW** two day course from **September 24-25**. The course is designed to be a condensed version of previous Soil Foodweb courses, providing more 'how to' information including compost pre-activation receipts, compost tea receipts, making a compost tea brewer and more. For those who have never taken our previous courses, this course will be a good starting point, providing an overview of Soil Foodweb principles without committing to the full six day course. For those who have taken our previous courses, this course will not only be a good refresher of the Soil Foodweb principles, but is intended to be more practical, less theoretical.

The course will be taught primarily by Matthew George with assistance from Christine George. Matthew, Manager of Soil Foodweb Canada, has a Bachelor of Science from the University of Toronto, has been working with Soil Foodweb for over two years, and has taken the Soil Foodweb Courses three times himself. Christine, Head Lab Technician at Soil Foodweb Canada, has a Bachelor of Science in Microbiology from the University of Guelph, worked in the compost industry for over five years and has been at Soil Foodweb Canada for almost three years.

Introduction to Soil Biology – 1/2 Day

Sample Course Information: What is the Soil Foodweb? What is Biological Farming? Is there a difference between Biological Farming & Organic Farming? How does the Nitrogen Cycle play a role? Are nutrients/minerals important in the Soil Foodweb approach? How does this approach work for farmers? Ranchers? Gardeners? Arborists? Nurseries? & more!

Compost Technology – 1/2 Day

Sample Course Information: What is good compost? Is there such a thing as bad compost? How do you make different types of compost, such as thermal compost, worm compost, and static compost? Does my soil need compost? & more!

Compost Tea Technology – 1/2 Day

Sample Course Information: What is compost tea? What do you need to brew it and how do you do it? What are the compost tea receipts? How do you pre-activate compost for your tea? What inputs do you need and where can you get them? What are the benefits and drawback to compost tea compared to direct application of products? & more!

Laboratory Procedures, Microscope Use & Wrap Up – 1/2 Day

Sample Course Information: How does the lab look at my soil/compost/compost tea? What do the microorganisms in the soil look like? Can any of this be done by myself? How do you take everything we've learned and start right away? & more!
