Where to Get Microscopes in Canada

Searching the net and sourcing equipment for our lab in Canada has revealed the following sources as a good place to acquire a college level compound microscope. Please get a college level microscope (4x, 10X and 40X objective lenses, 10X wide field eyepiece, and a N.A 2.5 (or greater) ABBE condenser, with an iris diaphragm you can focus).

Two microscopes recommended by Dr. Elaine Ingham are: Alexis J-model & Leica CME.
